DECISION SCIENCES Journal

VOLUME 19 TITLE INDEX

Affective Responses within a Complex Decision-Making Task: The Influence of "Perceptually" Ill-Structured Problems. Lewis A. Taylor III. (1): 39-54.

All-Units Discounts for Standard Container Sizes. Thomas W. Knowles and Pricha Pantumsinchai. (4): 848-857.

Alternate Routing Strategies in Batch Manufacturing: An Evaluation. Paul M. Bobrowski and Vincent A. Mabert. (4): 713733.

Analysis and Approximation of a JIT Production Line. Scott Jordan. (3): 672-681.

Capacity Management in Health Care Services: Review and Future Research Directions. Vicki L. Smith-Daniels, Sharon Schweikhart, and Dwight E. Smith-Daniels. (4): 889-919.

"Company Forecast Accuracy for Exponential Smoothing Models of Earnings-Per-Share Data for Financial Decision Making": A Comment. John P. Dickinson. (1): 233-235.

Composite Forecasting with Dirichlet Priors. David A. Bessler and Peter J. Chamberlain. (4): 771-781.

Computer Aided Process Structuring Via Mixed Integer Programming. Gary Klein, Philip O. Beck, and Benn Konsynske. (4): 750-761.

A Conjunctive-Compensatory Approach to the Self-Explication of Multiattributed Preferences. V. Srinivasan. (2): 295-305.

Determining Optimal Selling Price and Lot Size When the Supplier Offers All-Unit Quantity Discounts. Prakash L. Abad. (3): 622634.

Diversification Gains from Including Real Estate in Mixed-Asset Portfolios. James R. Webb, Richard J. Curcio, and Jack H. Rubens. (2): 434-452.

The Effects of an Interactive Graphics-Based DSS to Support Problem Structuring. William E. Pracht and James F. Courtney. (3): 598-621.

Efficient Modular Implementation of Branch-And-Bound Algorithms. Roger V. Johnson. (1): 17-38.

An Empirical Study of Inbound Consolidation Opportunities. Frank P. Buffa. (3): 635-653.

An Evaluation of Order Release Mechanisms in a Job-Shop Environment. Gary L. Ragatz and Vincent A. Mabert. (1): 167-189.

An Experimental Analysis of Capacity Sensitive Setup Parameters for MRP Lot-sizing. Amitabh S. Raturi and Arthur V. Hill. (4): 782-800.

An Experimental Evaluation of Articulation of Preferences in Multiple Criterion Decision Making (MCDM) Methods. Ram Narasimhan and Shawnee K. Vickery. (4): 880-888.

Four Approaches to the Classification Problem in Discriminant Analysis: An Experimental Study. Erich A. Joachimsthaler and Antonie Stam. (2): 322-333.

Heuristic Optimization of Physical Data Bases: Using a Generic and Abstract Design Model. Prashant Palvia. (3): 564-579.

Identifying the Coarse and Find Structures of Market Segments. G. R. Dowling and D. F. Midgley. (4): 830-847.

An Implicit/Explicit Approach to Multiobjective Optimization with an Application to Forest Management Planning. Terry P. Harrison and Richard E. Rosenthal. (1): 190-210.

Implicit Optimal and Heuristic Labor Staffing in a Multiobjective, Multilocation Environment. Stephen E. Bechtold. (2): 353-372.

Inflation, Maintenance of Capital, and the IRR Model: An Appraisal and Alternative. Ronald V. Hartley. (1): 93-103.

Instructing Operations Design: An Experiential Approach. Roger J. Gagnon. (2): 453-471.

"A Joint Economic-Lot-Size Model for Purchaser and Vendor:" A Comment. S. K. Goyal. (1): 236-241.

Joint Product Cost Allocation in the Context of Cost-Plus Pricing Determinations with Non-Uniform Markups. Arnold Schneider and Robert G. Jeroslow. (2): 424-433.

Least Absolute Value Regression: Necessary Sample Sizes to Use Normal Theory Inference Procedures. Terry Dielman and Roger Pfaffenberger. (4): 734-743.

Location of Inventories in an MRP Environment. Marilyn K. McClelland and Harvey M. Wagner. (3): 535-553.

Matched Pairs Discrimination: Methodology and an Investigation of Corporate Accounting Policies. Herbert G. Hunt III and J. Keith Ord. (2): 373-382.

Mathematical Formulation of the Task Segregation Problem in Internal Control System Design. Bin N. Srinidhi. (1): 1-16.

A Mathematical Programming Approach to Sensitivity Analysis in Single-Stage Decision Making. James J. Buckley. (1): 211-232.

Maximizing the Probability of Achieving a Target Profit in a TwoProduct Newsboy Problem. Amy Hing-Ling Lau and Hon-Shiang Lau. (2): 392-408.

Measuring Master Production Schedule Stability under Rolling Planning Horizons. Sri V. Sridharan, William L. Berry, and V. Udayabhanu. (1): 147-166.

Meta-Design Considerations in Developing Model Management Systems. Ting-peng Liang and Christopher V. Jones. (1): 72-92.

The Minimum-Covering/Shortest-Path Problem. John Current, Charles ReVelle, and Jared Cohon. (3): 490-503.

Multidimensional Assignment Problems. Kenneth C. Gilbert and Ruth B. Hofstra. (2): 306-321.

Multiple-Criteria Decision Making Including Qualitative Factors: The Post-Model Analysis Approach. Jae Kyu Lee and E. Gerald Hurst, Jr. (2): 334-352.

A Multivariate Methodology for Simultaneously Capturing and Clustering Judgment Policies. Louis W. Glorfeld and George C. Fowler. (3): 504-520.

A New Class of Models for the Discriminant Problem. Fred Glover, Sam Keene, and Bob Duea. (2): 269-280.

A Note on Input Consistency in the Application of AHP. Fatemeh Zahedi. (3): 708-710.

Open Order Rescheduling in Job Shops with Demand Uncertainty: A Simulation Study. David Christy and John J. Kanet. (4): 801-818.

Optimal Portfolio Selection of Bonds and Stocks. C. Sherman Cheung and Clarence C. Y. Kwan. (1): 119-137.

Optimum Conservative Price Increase Decisions in a Competitive Market. Hani I. Mesak and Richard C. Clelland. (4): 920-929.

Order Promising and the Master Production Schedule. Marilyn K. McClelland. (4): 858-879.

Orthogonal Information Structures—A Model to Evaluate the Information Provided by a Second Opinion. Niv Ahituv and Boaz Ronen. (2): 255-268.

A Principle for Corner Store Positioning under Intrinsic Modeling for Traffic Orientation. Aharon Hibshoosh. (3): 580-597.

A Public Housing Queue with Reneging and Task-Specific Servers. Edward H. Kaplan. (2): 383-391.

Repetitive Lots: Flow-Time Reductions through Sequencing and Dynamic Batch Sizing. F. Robert Jacobs and Daniel J. Bragg. (2): 281-294.

Replenishment Analysis in Distribution Requirements Planning. James H. Bookbinder and Donald B. Heath. (3): 477-489.

Scheduling Parallel Processors with Setup Costs and Resource Limitations. James O. Frendewey, Jr. and Robert T. Sumichrast. (1): 138-146.

A Sequential Selection Problem. Clarence C. Y. Kwan and Yufei Yuan. (4): 762-770.

Solving Resource Allocation Problems When Learning Effects Are Present. Terry P. Harrison, Gary A. Kochenberger, Rose S. Prave, and Tracy D. Rishel. (4): 744-749.

A Stepwise Procedure for Constrained Utility Maximization. Shahram Taj and Cleve Willis. (1): 104-118.

A Stochastic, Psychometric Valuation Model for Personnel Selection Systems. Jean C. Wyer. (3): 700-707.

A Transportation Approach to Locating Plants in Relation to Potential Markets and Raw Material Sources. Chandrasekhar Das and Sunderesh Heragu. (4): 819-829.

A Unified Approach to Hedging Interest Rate Risk with Financial Futures. Jimmy E. Hilliard. (3): 654-671.

Using Conjoint Analysis to Predict Trial and Repeat-Purchase Patterns of New Frequently Purchased Products. Fred S. Zufryden. (1): 55-71.

A Variable Selection Criterion in the Linear Programming Approaches to Discriminant Analysis. Ravinder Nath and Thomas W. Jones. (3): 554-563.

Waiting Line Effects in Analytical Maintenance Float Policy. Christian N. Madu and Nicholas C. Georgantzas. (3): 521-534.

Warranty Cost Estimation: A Goal Programming Approach. Amitava Mitra and Jayprakash G. Patankar. (2): 409-423.
